

ADITYA ARORA

SENIOR QA ENGINEER | SDET | AUTOMATION TESTING SPECIALIST

addie.usit@gmail.com | +91 92686 78880 | Gurugram, India | <https://www.linkedin.com/in/aditya-arora-331364234/>

SUMMARY

SDET and Quality Engineer with 4+ years of experience building scalable test automation frameworks for web, mobile, API, and AI-native applications. Deep expertise in Playwright, Cypress, Appium, Postman, Apache JMeter, and modern LLM Agentic Testing workflows. Proven track record integrating automated suites into CI/CD pipelines, engineering self-healing test systems with multimodal computer vision, and evaluating enterprise-grade AI applications for functionality, performance, and defect reduction.

CORE SKILLS

Automation Playwright, Cypress, Selenium, Appium, E2E, Mobile Automation

Languages JavaScript, TypeScript

Frameworks Page Object Model (POM), BDD (Cucumber), Hybrid UI + API

AI & Agentic QA: LLM Test Case Generation, Claude Code Integrations, Self-Healing Locators, Agent Verification, Vision/Pixel Neural Networks, LLM Benchmarking (Latency/Cost)

API Testing Postman, REST APIs, JSON & Schema Validation, API Automation

Performance Apache JMeter, k6; performance, load and stress testing

CI/CD Git, GitHub Actions, Jenkins; automated test execution in delivery pipelines

Testing Functional, Regression, Integration, System, Defect Lifecycle

Domains Healthcare AI, SaaS, Insurance, E-commerce, Customer Onboarding

PROFESSIONAL EXPERIENCE

Radiansys Technologies (Simplr) — SDET | Jun 2022 – Aug 2026 | Gurgaon

- Designed and maintained scalable automation frameworks using Playwright, Cypress, and Appium, improving overall test efficiency by 70%.
- Architected end-to-end LLM-driven testing workflows using Claude Code and custom agent skills to autonomously generate, execute, and validate E2E Playwright test suites, reducing test creation effort.
- Engineered a Self-Healing Test Framework incorporating agent checks and multimodal computer vision (pixel/DOM inspection) to automatically repair broken selectors during runtime execution.
- Developed and maintained 300+ automated test cases for a healthcare AI mobile application, achieving a 95% automation pass rate.
- Built a hybrid UI + API automation framework, validating UI data directly against API responses to improve test reliability.
- Integrated automated Playwright/Cypress regression execution with CI/CD workflows using GitHub Actions and Jenkins to support continuous testing and faster feedback.
- Reduced manual regression effort by 50% through strategic test automation planning and expanded automation coverage.
- Led Android and iOS mobile automation using Appium, increasing validation accuracy by 60%.
- Designed API automation workflows using Postman and RestAssured, reducing production defects by 30%.
- Executed performance and load testing using Apache JMeter, identifying bottlenecks and improving system responsiveness by 40%.
- Collaborated with cross-functional Agile teams and mentored junior QA engineers, increasing team productivity by 35%.

Stack: Playwright · Cypress · Appium · Postman · RestAssured · JMeter · GitHub Actions · Jenkins · JavaScript · TypeScript

Kyro Consulting — QA Engineer | Jan 2021 – Jan 2022 | Gurgaon

- Developed end-to-end automation frameworks for web and mobile using Cypress, Playwright, and Appium, improving execution speed by 60%.
- Performed cross-platform mobile testing on Android and iOS, reducing mobile defects by 35%.
- Conducted performance testing with JMeter, identifying bottlenecks and improving system efficiency by 30%.

Stack: Cypress · Playwright · Appium · JMeter · JavaScript

AI / ENTERPRISE QA EXPOSURE

- AI Agent & LLM Validation: Experience generating automated test cases from AI requirements, evaluating agent runner pipelines, and validating nondeterministic LLM outputs

Healthcare AI mobile application testing with 300+ automated cases; enterprise SaaS testing across web, mobile, and API workflows; experience supporting complex customer-facing systems with continuous regression, API validation, cross-platform mobile coverage, and performance/load testing.

EDUCATION

Bachelor of Computer Applications (BCA) — Himalayan Garhwal University | Aug 2020 – May 2023
